

§0 ABSTRACT

§0

I run the frontend of a sustainability platform in Barcelona and build VTEX IO commerce for an Argentinian agency. Both at once, from Tucumán.

React · TypeScript · Next.js · Astro · VTEX IO · Node · Cloudflare Workers · PostgreSQL · GraphQL · MCP

ROLE	ACTIVE SINCE	MEASURED SCALE
Frontend · Full-Stack	2023-04 →	4,559 commits · 44 repos

T-03

no local repo: stated, not measured

§3 CHARACTERISTICS

§3.1

1,702 of the 5,246 commits in BCome's frontend are mine. I am the top author of 26, in a repository that started in March 2021 and that I joined in December 2024.

§3.1

2026-08-17 · first commit 2021-03-15 · 422 .tsx · 163 .ts

§3.2

I am leading that frontend's migration to React 18.3.1, Vite 7.1.6 and Tailwind 4.1.17, with Bootstrap 4.6.2 still in the codebase. To let them coexist, Tailwind is loaded with Preflight disabled and only its theme and utility layers imported, not the whole package. The bare border class is useless: Bootstrap overrides it with !important.

§3.2

Debt measured before starting: 1,342 inline styles, 367 unique hex colours, a 499-line app.scss

§3.3

I published shopify-insights-mcp on npm under MIT: a 10-tool MCP server that returns readings rather than Shopify rows. Instead of "you have 45,000 in sales", it answers "you have 45,000, 12% down on last month".

§3.3

v1.1.0 on npm · @modelcontextprotocol/sdk · Admin GraphQL · stdio

§3.4

bcome.biz: 95 of 95 commits. I moved the site off WordPress onto Astro 6.1.10 with 58 hand-written redirects, because @astrojs/sitemap only pairs identical paths and our slugs are localised.

§3.4

58 entries in vercel.json · 0 rewrites

§4 ARCHIVE

§4.0

A-01

shopify-insights-mcp

Servidor MCP que no devuelve datos de Shopify sino lecturas. Publicado en npm con licencia MIT.

MCP · npm · 2026 · Herramientas: 10 tools

A-02

BCome — plataforma

Lead frontend de una plataforma de circularidad: la app principal, el panel de administración y el widget que se embebe en tiendas de clientes.

React 18 · 2024→ · Commits propios: 1.702 de 5.246

A-09

bcome.biz

El sitio público de BCome, sacado de WordPress a Astro. Bilingüe con slugs traducidos, 25 páginas y 71 componentes. Autor único.

Astro 6 · 2026 · Commits propios: 95 de 95

A-03

Koru Shipday

Integración logística entre VTEX y Shipday: carga masiva de tarifas, envío de órdenes y actualización de tracking. App nativa del Admin de VTEX.

VTEX IO · 2026 · Casos de test: 391 tests

A-14

Catálogo Boost

ABM masivo del catálogo VTEX desde Excel: categorías con árbol y drag & drop, marcas, imágenes por SKU y visibilidad programada por cron.

VTEX IO · 2026 · Código: 6.855 líneas

§2 LIMITS

§2.6

WHAT I DO NOT DO

Brand identity. Native apps. WordPress. SEO detached from the code.

§2.7

OUTSIDE

OPERATING RANGE

Redesigns without access to the real data. Deadlines fixed before the scope is defined. “Make it like our competitor’s” with no product decision behind it.

§2.8

I take one freelance project at a time. For employment, I am listening to remote offers.

§2.8

Availability as of 2026-08-17

This sheet is not written: it is printed from the site, from the same data file, so it cannot diverge from it. The PDF carries the revision in its name, and earlier ones are not deleted: a link shared six months ago still opens, and opens the revision it claimed.
