Mauro Venticinque

Abstract

0

I run the frontend of a sustainability platform in Barcelona and build VTEX IO commerce for an Argentinian agency, both at once from Tucumán. And I build custom systems for companies, one project at a time.

React · TypeScript · Next.js · Astro · VTEX IO · Node · Cloudflare Workers · PostgreSQL · GraphQL · MCP

Highlights

BC-1

One design system (127 PRs). Tokens, a single family per component on Radix, and lint rules in CI that block regressions.

BC-1

IT-3437 OR IT-3388 OR IT-3436: 130 PRs, menos 3 releases

BC-2

Digital Product Passport (15 PRs). A configurator with live preview per item and language, front and back, for EU regulation.

BC-2

IT-3498 OR IT-3432 OR IT-3430: 13 front, 2 back

BC-3

Visible to AI assistants (7 idiomas). The widget signs the server-rendered HTML, so ChatGPT and Claude read the brand without running JavaScript.

BC-3

ls src/i18n del frontend · frontend#1835, client-extension#323

RC-1

Koru Shipday (167/167). VTEX–Shipday integration for 24-hour Flex delivery: bulk rates, order dispatch and tracking.

RC-1

commits propios sobre el total del repo koru-shipday · 40 PRs

RC-2

Financing Options (235/235). Instalments app: payment rules, interest-free plans and a comparison table on the product page.

RC-2

commits propios sobre el total de koru-financing-options · 19 PRs

RC-3

Koru VTEX MCP (15 herr.). Connects a store to Claude for sales by SKU and order diagnosis. In trial with a fashion retailer.

RC-3

herramientas de sólo lectura en packages/domain y contracts

IN-1

ISI S.R.L.: Odoo 11 → 19 (126/126). Three companies migrated with balances matching to the cent.

IN-1

saldos conciliados en $0,00 · docs/CORTE.md

IN-2

Comercia (890 tests). Sales management with Argentine e-invoicing and a WhatsApp bot. In development.

IN-2

aprox., it()/test() en 106 archivos · grep

IN-3

Madernoa (3 repos). A landing page, and an MCP server that feeds the bot the live catalogue.

IN-3

landing, MCP y bot · 184 commits

Archive

4.0

A-01

shopify-insights-mcp

MCP server that returns readings of Shopify data, not raw data. Published on npm under the MIT license.

MCP · npm · 2026 · Tools: 10 tools

A-03

Koru Shipday

Logistics integration between VTEX and Shipday: bulk rate upload, order dispatch and tracking updates. A native VTEX Admin app.

VTEX IO · 2026 · Test cases: 391 tests

A-18

Financing Options

VTEX IO app that shows installments and interest-free plans on the product page, with payment rules configurable from the Admin.

VTEX IO · 2026 · Own commits: 235 of 235

A-19

Koru VTEX MCP

Remote MCP server that connects a VTEX store to Claude: sales by SKU, order diagnostics and sellability diagnostics. Read-only.

Cloudflare Workers · VTEX IO · 2026 · Tools: 15 read-only

A-04

Koru Power Seller

Social selling for VTEX store sales staff. White-label and multi-tenant: one deployment serves every retailer, each with its own brand and credentials.

Cloudflare Workers · 2026 · Code: 10,382 lines

Limits

2.6

WHAT I DO NOT DO

Brand identity. Native apps. WordPress. SEO detached from the code.

2.7

OUTSIDE OPERATING RANGE

Redesigns without access to the real data. Deadlines fixed before the scope is defined. “Make it like our competitor’s” with no product decision behind it.

2.8

I take one freelance project at a time. For employment, I am listening to remote offers.

2.8

Availability as of 2026-11-08

This sheet is not written: it is printed from the site, from the same data file, so it cannot diverge from it. The PDF carries the revision in its name, and earlier ones are not deleted: a link shared six months ago still opens, and opens the revision it claimed.
